

# DT – Maya weaving using a backstrap loom

Design thinking requires you to fully understand the brief, know your materials and formulate new ideas that can be made and tested.

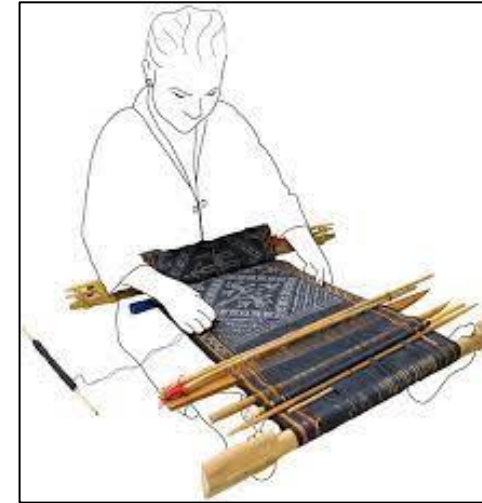

## Vocabulary

- weave: to make fabric by interlacing threads over and under each other in a pattern.
- loom: a frame or machine used to hold threads in place while weaving.
- warp: the vertical threads that are stretched tightly on a loom.
- weft: the horizontal threads that are woven over and under the warp threads.
- pattern: a repeating design or sequence that appears throughout a piece of fabric.
